

The Power of We™

IP Office

Simple, Powerful communications for your Small & Medium Business

Successful companies are always looking for opportunities to do more with less. Their aim is to keep the company flexible, innovative and competitive and guarantee successful dialogue with customers, without driving up operating costs and capital expenses.

Avaya puts the solution at your fingertips: the Avaya IP Office communications system.

Benefits for you:

- Reliable availability at a high level
- Reduced staff workloads and improved efficiency
- Integration of all important channels of communication
- Time and money savings

What is IP Office?

Avaya IP Office is the right choice for all small and medium size businesses today. Supporting up to 1000 employees, it is the perfect solution for start-ups and more established businesses, whether you operate from a single office, a home office or across multiple stores or locations.

Built-in resiliency for non-stop operations

IP Office provides business continuity through its built-in resiliency and remote working capabilities enabling business with multiple locations or with staff unable to travel to the office to work effectively during unforeseen circumstances. Storms or family emergencies don't get in the way of making business happen.

Lower mobile phone/long-distance bills

IP Office offers many opportunities for reducing the cost of calls made by your staff out on the road, from mobiles, in hotels and even abroad.

Expand your talent pool without increasing real estate

IP Office gives you the flexibility to allow employees to work remotely from home – wherever that may be, to avoid over-crowding at peak office times, for example.

**Work around
the world**

**Perfect your
customer service**

**Be effective,
even when travelling**

**Connect worldwide
offices and reduce costs**

**Telephone conferencing
for up to 2x64 participants**

IP Office improves productivity

Putting together your Unified Communications solution is child's play.

It takes just four steps:

A - Select the appropriate user profile for your employees

Office Worker*

Delivers ability to work smarter in the office

- Control phone calls from your PC.
- Manage messages efficiently using Unified Messaging features.
- Set up and manage audio conferences.
- View colleagues' presence, indicate your availability and use instant messaging.

* Requires Avaya IP Office Preferred Edition; not in conjunction with the Server Edition

Includes:

- Unified Messaging
- one-X® Portal for IP Office (excluding telecommuter function)
- Flare Communicator

Mobile Worker*

Delivers ability to work from on the road

- Let customers reach account managers on a single number, whether they are in the office or on the road.
- Integrate mobile telephones out and about or on site.
- From your mobile, view colleagues' presence, indicate your availability and use instant messaging to speed up response times.
- From your mobile, set up and manage audio conferences.

* Requires Avaya IP Office Preferred Edition; not in conjunction with the Server Edition

Includes:

- one-X® Mobile Preferred
- Text-to-Speech

Teleworker*

Delivers ability to work from home or alternative location

- Turn any phone into your office phone from a PC with internet access.
- Availability indicators make collaboration easier for geographically remote employees.
- Increase productivity by reducing or eliminating travel time.
- PC-based telephony, point-to-point video speeds up work processes.
- Save costs of office rental and furnishing.

* Requires Avaya IP Office Preferred Edition; not in conjunction with the Server Edition

Includes:

- one-X® Portal for IP Office
- Video softphone
- Unified Messaging
- Remote Worker

Power User*

Delivers ability to work from anywhere

- Includes all of the features from Office Worker, Mobile Worker and Teleworker.
- Single numbering ensures highest availability for customers and employees alike (One Number Concept).
- Just a laptop, Internet connection and a headset are required to create an office wherever your employees are.

* Requires Avaya IP Office Preferred Edition; not in conjunction with the Server Edition

Includes:

- one-X® Mobile Preferred
- one-X® Portal for IP Office
- Unified Messaging
- Text-to-Speech
- Video softphone
- Remote Worker
- Flare Communicator

Receptionist

Delivers professional call handling, even at peak periods

- Fast call processing, including during periods of large call volumes, with intuitive PC user interface and system status indicators for all employees in the network.
- Centralised call management for all sites.
- One receptionist can act for several companies or sites, helping reduce costs.

Includes:

- SoftConsole

Customer Service Agent*

Delivers ability to efficiently and effectively service customer calls

- Better availability of customer service information.
- Better time management improves employee satisfaction.
- Agents can visualise their own performance through a browser-based client.

* Requires Avaya IP Office Advanced Edition; not in conjunction with the Server Edition.

Includes:

- Customer Call Reporter Agent (CCR)

Supervisor*

Delivers ability to track, measure and create custom reports on customer service & agent productivity

- Perfect control thanks to intuitive and easy-to-use browser interface.
- Save time creating reports – drag and drop reporting with built-in templates
- Optimised scheduling of employees' time by analysing reports.

* Requires Avaya IP Office Advanced Edition (includes 1 Supervisor). Additional Supervisor & Agent licences must be ordered separately.

Includes:

- Customer Call Reporter Supervisor (CCR)

B - Decide which edition best meets your needs

Basic Edition

Includes: Integrated voicemail, 2 channels (scalable to 6), simple web management interface

Designed for the sub-20 user market space with simple telephony needs

- Supports analogue or digital desktop phones (IP Phones are not supported).
- Customers can upgrade to Essential Edition at any time without replacing hardware or licences.

Essential Edition

Includes: Integrated voicemail, 2 channels (scalable to 6), Mobile twinning, Mobile Call Control & one-X Mobile Essential Edition for all users, 4 Remote worker licences

The foundation of your office communications solution:

entry-level Unified Communications to all of your employees

- Faster and improved availability as you are automatically put through to the right person.
- Mobility: All users can be reached on a single number, whether they are in the office or on the road. Besides one-X Mobile Essential Edition provides a graphical interface for call control and allows a one-number service for both incoming and outgoing calls.

Preferred Edition

Includes: VoiceMail Pro licence, 4 channels (scalable to 40)

Improved reaction capabilities and productivity

With IP Office Preferred Edition, you get everything that's in the Essential Edition, plus:

- Secure "Meet-Me" conferencing: Faster decision-making and better team work.
- Intelligent call routing: A number of programmable options that ensure your customers can quickly reach the right person.
- Call recording: Built-in automatic and on-demand call recording is a great way to keep tabs on your business operations, deal with disputed orders and help you train your staff.

Advanced Edition

Includes: Customer Call Reporter (CCR) Server with one Supervisor licence and numerous reporting functions

Perfect customer communications and service

Requires Preferred Edition. In addition to the features of the Preferred Edition you also get:

- Real-time customer service management: Detailed reports are available at all times, giving you immediate warning of critical call levels being exceeded enabling you to take swift action to ensure your service levels do not fall.
- Call recording library: Easily archive all recorded calls and seamlessly search and replay any conversation.
- Self-Service 24/7: Customers can check order status and more using Integrated Voice Response (IVR) services

Server Edition

Includes: Preferred Edition, central voicemail with up to 100 ports on one server, meet-me conference, automatic call distribution, mobile twinning and much more...

- Designed for mid-sized companies, 1000 subscribers are supported at one or up to 32 locations.
- Only one primary server needed (500 subscribers). A second server and further components can be connected at any time to improve security and for extensions.
- Resilient architecture, central management and central licensing for all subscribers and locations
- Comprehensive functionality for telephony, unified communications, mobility and collaboration

C - Select the telephones you want

Telephones

IP Office supports a wide range of different telephones. These devices are designed for many different applications. To enable your employees to carry on working outside the office, all you need is a broadband Internet connection at the remote end. The connection to the main site can be made either with or without a VPN gateway.

For further details, see page 6

D - Select your optional extras

- Contact Store (call recording with functions to search by date and time)
- Computer Telephony Integration (CTI)
- Cordless telephones: DECT R4, Wireless LAN (Wi-Fi)
- Multi-site option: Small Community Network (SCN) Supports up to 32 locations and 1000 employees

IP Office Platform Options

IP OFFICE 500v2

- Supports up to 384 extensions (digital, IP & analogue)
- Trunk interface - 204 Analogue trunks, 8 PRI trunks (240 channels), 16 BRI trunks (32 channels), 128 SIP trunks voice
- 2 x 64 participant conferences, Meet-Me Conferencing
- Supports up to 1000 employees across 32 locations

IP OFFICE SERVER EDITION

- Based on the HP DL 360 GL or HP DL 120 GL servers
- DL 360: Dual CPU, 12 GB RAM, 250 GB HD, Hot Swap PS & HD, up to 500 subscribers
- DL 120: Single CPU, 12 GB RAM, 250 GB HD, up to 250 subscribers
- Supports redundant operation
- 1000 subscribers at one or up to 32 locations

Expansion cards

Trunk Card

Phone Card

Phone cards

The following phone cards are available:

- 8 port digital phone card (maximum of 3)
- 32 channel VCM card (maximum of 2)
- 64 channel VCM card (maximum of 2)
- 2 port analogue phone card (maximum of 4)
- 8 port analogue phone card (maximum of 4)

C110 Unified Communications Module

- An integrated processor server running Linux OS.
- Comes preloaded with Preferred Edition, one-X Portal and IM/Mobility server software images.
- Simplifies deployments by providing an integrated server option for supporting and maintaining IP Office applications
- Linux-based server means customer avoids paying for Microsoft Server licences

Trunk cards

The following trunk cards are available:

- 4 port analogue trunk card (maximum of 4)
- 2 or 4 port BRI trunk card (maximum of 4)
- 1 or 2 port PRI trunk card (maximum of 4)

Combination cards

(maximum of 2)

Combination cards are available with:

- 1) 6 digital and 2 analogue telephones, and 4 analogue trunks and 10 VCM channels
- 2) 6 digital and 2 analogue telephones, and 2 port BRI trunk card and 10 VCM channels

4 port expansion card

(maximum of 1)

For connection of 4 additional expansion modules

Expansion modules

External expansion module options

The following phone cards are available:

- IP500 analogue phone expansion module with 16 or 30 extensions
- IP500 digital phone expansion module with 16 or 30 extensions

Avaya Wireless LAN Access Point

3641

3645

WLAN telephony

Models **3641** and **3645** are wireless telephones that support 802.11a wireless networks.

The 802.11a standard is suitable for networks in which a large number of users wish to transmit voice data wirelessly. These telephones also support 802.11b/g, are water and dust resistant, have large displays and easy-to-use interfaces, and come with a variety of battery sizes.

- 1 Introduction to IP Office
- 2 IP Office system components
- 3 IP Office server and telephones
- 4 **Features and applications**
- 5 Get to know Avaya

IP Office Features and Applications

Avaya Flare Communicator

Avaya Flare Communicator for IP Office is an application which works with the IP Office suite. This product makes possible corporate communication via iPad tablets, laptops or desktop PCs with Windows.

Using Flare Communicator with iPad tablets, laptops or desktop PCs with Windows, you can make and receive calls using the landline phone's extension number. Flare Communicator also provides access to the following means of communication via one single user interface:

- Email messages
- Messages
- Call history
- List of contacts (system contacts and personal contacts)
- Presence and call status

Avaya Video Conferencing Solution

Straightforward, cost-effective and flexible video-conferencing solutions, from single seat to systems for larger conference rooms with several monitors, point-to-point and point-to-multipoint connections. AVCS is designed for operation in the IP Office with up to 6 participants, and in the entire SCN network with up to 32 locations. The benefits for customers are clear to see, with immediate reduction in travel expenses by reducing the cost of business travel, business processes and decision-making allowing sales to be expedited as the time needed for travel is eliminated.

Mobility

Mobile Twinning

This is a typical application for customer-facing staff. The employee only needs to provide his customers with his office extension number. Calls are indicated in the office and on his mobile or DECT telephone.

Mobile Call Control

This application allows a mobile user to accept a twinning call on a mobile device, use DTMF codes to hold the call and use the features of IP Office.

one-X® Mobile Essential Edition

Avaya one-X® Mobile Essential Edition allows a one-number service and provides an easy-to-use graphical interface for call control. IP Office supports "Single Mode" mobile clients, including selected Nokia/Symbian, Apple iPhone OS Client and Windows Mobile 5 & 6 handsets.

one-X® Mobile Preferred Edition

Avaya one-X® Mobile Preferred Edition provides a rich user interface and makes use of the advanced capabilities available on smartphones like speech recognition to issue audible commands and streaming audio for visual voicemail. Unified communications features like Presence, Instant Messaging are provided along with click-to-conference and visual voicemail capabilities. IP Office supports this rich mobile client on Android and Apple iPhone mobiles. The Android and iPhone widget provides updates on events of interest like outstanding IM messages, newly deposited voicemail messages and conference participants' entry/exit.

Bring Your Own Device (BYOD) – use of private end devices

Staff are increasingly using their own end devices, such as smartphones, tablets, notebooks etc. at the workplace for work purposes. As well as providing simple integration in the company network, the necessary level of security must also be maintained. Avaya provides the appropriate solution for the company network. This includes components from the Avaya Network and Security portfolio of the WLAN 8100 series and ID Engine.

Avaya one-X® Portal

one-X® Portal for IP Office is a browser-based server solution and allows users to access telephony functions such as call management, conferences, speed dial, call logs, telephone directories, voicemail, instant messaging and federated presence with Google Talk as well as Microsoft Exchange calendar integration.

A one-X® Portal Microsoft Outlook Plug-in is available. This provides federated Presence, click-to-call, call logs as well as alerts for incoming calls with options to accept or reject and visual voicemail all of which greatly improves user productivity.

Customer Call Reporter (CCR) Call Center

IP Office Customer Call Reporter is a server-based Contact-Center solution specifically developed for small companies. CCR is completely web-based and can very easily be installed on a server without the need for any client software deployment.

- Browser-based tool for managing and controlling customer service levels.
- Track and record agent and supervisor workload.
- Create real-time and historical reports in a variety of formats.
- Target segment: small companies with fewer than 30 agents.
- Wall-board can be modified according to customer requirements.
- Report Scheduler. built-in templates & custom reports.

Computer Telephony Integration (CTI)

Computer Telephony Integration (CTI) is the missing link between your communications system and your business applications. IP Office supports the open CTI standards. This means that a wide range of third-party solutions can gain access to IP Office.

IP Office offers 2 CTI solutions:

CTI Link Lite – Free, supports all required functions for a range of applications, including screen-popping and many third-party products.

CTI Link Pro – Supports advanced features including the option to control several telephones and access to call centre operations

SoftConsole for Receptionist

SoftConsole is the PC-based Windows Operator Console for IP Office aimed at receptionists. Incoming calls are shown on the screen along with the status of calls on hold and transferred calls.

Receptionists can easily see which parties are busy, available or not at their desk. That allows them to route calls quickly and effectively.

Unified Messaging

Unified Messaging Service (UMS) enables voicemail and e-mail to be synchronised between VoiceMail Pro-Server and the e-mail client (Preferred Edition needed).

Email applications such as Outlook, which support IMAP, can connect to the IMAP server on which the VoiceMail Pro server is running. When a voicemail is received by the email client as a .WAV attachment, it is handled like every other email. Once the voicemail message has been heard, its status is set to read. When it is deleted, it is removed from the VoiceMail Pro server too. This synchronisation through IMAP improves employee productivity and increases customer service.

Remote Worker and VPN phone

Either the Remote Worker (NAT Traversal) feature or the VPN phone can be used for remote working / home-working. The Remote Worker functionality allows a remote IP phone to connect to the IP Office over the public internet without requiring any special equipment other than a standard broadband connection.

A VPN phone is an IP phone with VPN software built-in, allowing secure remote IP phone connection to the IP Office. For the VPN phone connection a VPN router/gateway is required at the IP Office site.

Essential Edition delivers 4 Remote Worker licenses, additional Remote Worker licenses are part of the Teleworker and Power User packages.

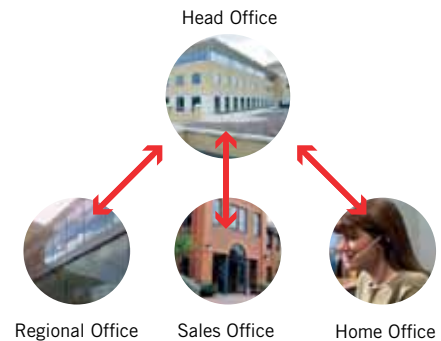

IP Office Features and Applications

Continued...

Hot-Desking

Hot-desking allows a number of users to share the same extension. Users log in with their own identity, and thus receive only their calls, their voicemail and other personal features.

This allows staff such as sales personnel who are in the office only occasionally to use the telephones and voicemail features without needing their own physical telephone.

MultiSite-Option

IP Office is ideal for any company with multiple locations. Connect up to 32 sites and have all the IP Office systems communicate seamlessly.

The following additional features are available:

- Presence / Busy Lamp Field across the Network
- Camp on
- Call-back when free
- Paging
- Call Pickup
- Centralised and personal/system directories
- Centralised call log
- Centralised and /or distributed voicemail
- Absent text messages
- SCN channel optimisation
- Distributed huntgroup
- Remote hot-desking
- Breakout dialing

For businesses with more than one location, IP Office can deliver continuous operation. In the event of a power outage, users with IP phones can automatically failover to another location, retaining full communications capabilities. The voicemail system can also have redundancy built in, so that a backup solution is always available.

Conferencing applications

Avaya IP Office comes with two built-in 64-party conference bridges to help small businesses collaborate seamlessly and cost-effectively. Businesses currently spending on conference calls with a service provider can reduce or eliminate those costs entirely. IP Office Conferencing employs easy-to-use conference control features to help keep people connected and making decisions faster.

Conference participants can be on-site personnel as well as external parties whether field-based engineers, sales staff on the road, customers or suppliers. Conference calls can be planned in advance or established ad-hoc as and when required. Meet-me conferencing, allowing participants to dial into the conference themselves using a security code, is provided with Preferred Edition. The conference host can view, mute or drop the participants as well as record/lock the conference using his Avaya display phone, Flare Communicator, one-X Portal and/or the one-X Mobile Preferred client.

Avaya – world leader

Avaya is a global provider of communication systems for companies of any size. It provides solutions for unified communications, contact centers and data networks as well as services.

Innovations based on years of experience and customer proximity

12 good reasons to choose Avaya

We are always just around the corner

- With several hundred business partners across the country, Avaya has a broad service network for consulting, implementation and maintenance, 24 hours a day, 7 days a week
- Consulting, planning and design of custom solutions by certified sales personnel employed by our business partners
- Live product demonstrations at our customer briefing centres

The full range of communication solutions

- The perfect applications and devices for your communications needs
- Integration of Unified Communications and Contact Center solutions
- The leading designer and implementer of Business Collaboration solutions
- Made-to-measure industry solutions
- Provisioning of data networking components, e.g. Ethernet switching and wireless LAN

Innovative market leader

- Number one provider of telephone systems for SMEs globally by turnover (source: Dell Oro 2011)
- Leading position in the Gartner Leader Quadrant for Unified Communications Contact Center and "Visionary" in Wired and Wireless LAN Access infrastructure (source: Gartner 2012)
- 10 million Avaya IP Office users and more than 265,000 systems sold worldwide
- IP Office named "product of the year 2011" by Frost & Sullivan and TMC; 2012 tested by the radio show as a reference system

About Avaya

Avaya is a global provider of business collaboration and communications solutions, providing unified communications, contact centers, data solutions and related services to companies of all sizes around the world. For more information please visit www.avaya.com/uk.
