

CYBERSECURITY STRATEGY & VISION

Develop and implement continuity with safety

GRC COMPLIANCE ROADMAP

CBS offers a comprehensive Service Catalogue related to CyberSecurity for critical infrastructures. We cover all attack vectors like GRC Consulting, VA/Pentesting, Post-Incident recovery and SOC services

Governance Risk and Compliant services involve assisting customers to be ISO certified and compliant with GDPR regulation:

- ISO27001 / ISO27701
- ISO22301
- vCISO & DPOaa Service

We also implement Risk Assessment & Risk Treatment projects using relational database GRC applications instead of 2 dimensional excels.

TESTING TECH COMPLIANCE

Testing customer infrastructures for cybersecurity readiness checks, like:

- Vulnerability assessments
- Patch Management & Reporting
- Penetration Tests
- Web Application Pentesting
- Post Incident Forensics and Incident Recovery tasks

PRODUCT & SERVICE SOLUTIONS FOR CYBERSECURITY

Performance monitoring combined with Security monitoring and response offers complete protection to the customer, combining solutions like:

- Managed EDR and XDR
- NOCaaS Service
- Threat Intelligence services
- Dark web Threat Hunting
- Sandbox Deception services
- Automated response for most vendors (SOAR)
